TWO STRIKES IN IRON BLOSSOM

Company Gets Ore on the Seventeen Hundred Level of South Shaft.

PROVES MINE ONE OF TINTIC'S DEEPEST

Fifth Level Drift Breaks Into Rich Ore Below Large

been opened now on the second, third. fourth, fifth, sixth and eighth levels, so the 1700 face is 900 feet vertically below the 1700 face is 200 feet vertically below any previous operation on the vein. In many places this fissure has made satisfactory ore bodies, especially along the 200 level, where the results of the past few months work are well known to stockholders. The company has virgin territory right from the surface, and the find of Tuesday demonstrates that the values in the vein go to great depth, and also that the management dering the coming months of development stand to find ore bodies of importance as on the 500 and other upper levels. Local circles doem this the most important strike ever made in the property.

Tuesday was a banner day for the Iron Blossom for late in the evening the drift on the 500-foot level was driven into the cave territory, the cave opened some time ago on the 400 level of the No. 2 shaft. Mr. Mangum says that this new ore assays well in gold and silver, being of considerably better grade than the big gold and silver body opened in the No. I shaft on the fifth level. This, therefore, is another very interesting point of the property which will be watched closely from now on.

The Iron Blossom management begins the new year with the happiest prospects ever enjoyed by it. These deep efforts prove the faith with which the officials regard the proposition, and there are a dozen or more spots now open for development in all of which are opportunities for bringing splendid results to view at any time. any previous operation on the vein. In

COPPER AND STEEL GOSSIP OF THE WES

The subject which caused the most diper Producers association, was the discrepancy of the current year to date between the government reports of copper exports and the Producers expert reports. At the present time the Producers have reported about 20,000,000 more pounds of copper exported than has the government, and while the reason for some difference in the two sets of figures for any given period are well understood by the trade, nevertheless in the natural course of events the total should appreach an equity. But for the last seven months on the contrar, the difference has steadily widened, and producers are planning to co-operate with the government in order to find out whether the difference is due to a difference in the tabulation methods or to some other reason—News Bureau.

Financial America says: Improvement has occurred in the steel industry since lest August, but net much. Proportion of idle capacity likely to be much larger next year. Earnings have fallen off in recent months, and the conviction is recoving among many steel men that the coming year will witness an adjustment both in prices and wages to a lower basis. Hope of profits comparable to this year's results are not generally held out for next year, and in consequence the question as to whether the effect of importance to those who are looking shead.

CHINO FAST INCREASING ITS COPPER TONNAGE W. Nevada Vank Con. Yer. Cop.

The report covering operations at the Chino properties during November has just been released from the eastern offices of the company. A total gain of 1,084,872 tons was made during November of a grade practically corresponding to the average of the total tonnage developed up to date total 31,756,699 tons, of an average grade of 2,59 per cent copper. The average thickness of the ore is 107 feet, and the average depth of the capping is eighty-seven feet. The partially developed ores in the property which are known to exist would bring the grand total to over 37,000,000 tons almost all of which can be steam shoveled.

UTAH COPPER BUYS THE SHAWMUT GROUND

James A. Pollock & Co., bankers and brokers, \$23-325 South Main street, furnish the following received over their rrivate wires yesterday afternoon:

Boston News Bureau says: The Shawmut Copper Co. has sold for '90,000 all its property to Sait Lake interests closely identified with the Utah Copper Co. Utah Copper will probably utilize the property as right of way for its new railroad and as a dumping ground.

If you want to rent that furnished room, use Tribune want ads. Call eithe phone. Bell 5200. Ind. 360.

WHITE ROCK SELLS GOOD CAR OF ORE

Two Drifts Providing Steady Tonnage of Silver and Lead Rock.

George Weston, general manager of the White Rock property of Beaver county, has been in this city for a few days sec-ing to the sale of another lot of firstclass ore from his property. The ship-ment averaged 46 per cent lead and 30 ounces silver, with some gold and copper values as well. This ore comes from the two drifts being sent into interesting territory on the 100-foot level, and conditions are extremely satisfactory. The

Cave.

Another important development has taken place at depth in the Iron Biossom property, the point of interest being the 1700 level, south of the No. I or south shaft. On Tuesday the management drove the shaft along the fissure into streaks of pay values, everything indicating that the face has just broken into the edge of what will be an important find of ore. When asked on Wednesday in regard to the find, Secretary W. Lester Mangum stated to The Tribune that it would take a day or two yet before any definite conclusions could be drawn. This is the same fissure which has been opened now on the second, third. This is the same fissure which has

TINTICS PRESERVE LIFE ON LOCAL EXCHANGE

There were two striking features on the local exchange Wednesday, Iron Blossom and Gold Chain, both being in demand at rising prices. In fact, the trading was confined almost entirely to the Tintic issues, and a rather satisfactory day's business was the result. There were 45, 186 shares of stock sold, the market value of which was \$14,832.55. The following were the closing unlisted and listed stock transactions:

OPEN FOR ORES

United States Company Will Handle Complex Zinc Ore at Midvale.

HUFF PLANT OPEN FOR CUSTOM WORK

Makes Available Heretofore

The United States company, therefore, enters the custom market for milling orea as well as ores for its smelter at Midvale. In a recent article in the Mining World, this Huff plant of the United States company was described in detail, and the following excerpt will be of interest in this connection:

"As a result of the excellent showing of this electrostatic plant, the United States Smelting, Mining and Refining company decided to put in a plant at its works at Midvale, Utah. The function of an electrostatic plant there is different from that in Platteville, for the ore from the mine of the United States company at Bingham contains about 9 per cent zinc in addition to the gold, silver and lead values.

This one is shirmed to the concentrator.

at Bingham contains about 9 per cent zinc in addition to the gold, silver and lead values.

This ore is shipped to the concentrator at Midvale, where it is crushed and milied by the usual methods of jigs and tables. In this concentration there were formerly two products, one a lead-pyrite carrying the iron and considerable zinc, and a talimgs carrying zinc and some gold and silver values, the object being to keep the zinc as low as possible in the lead concentrate, and yet at the same time make the maximum recovery of the gold, silver, lead and copper values. The zinc added materially to the difficulty and cost of smelting the lead concentrates, and, at the same time, was a total loss. In order to recover this zinc, three products were made in the concentrater, as lead-pyrite carrying practically no zinc, tailings free from zinc, and middlings containing about 22 per cent zinc, the balance pyrite and some copper, lead, gold and silver.

"To treat these middlings, an electrostatic plant was built near the concentrator. It is a frame building, 40x10 feet, and covered with corrugated sheet-iron. In general pian it is the same as the Piatteville piant—finished ore bins on the ground floors, and two floors of separators. The method of handling the ore is somewhat different. The middlings are shoveled from the table hutches in the wet concentrator into tram cars, which are pushed to the platform elevator at the electrostatic plant. The cars are raised to the third floor level, and, after weighing, are dumped into a forty-ton hopper. This is built over the dryer, and feeds automatically. After drying, the ore is screened as follows. Making A size 12 on 24, B size 24 on 50, C size through 50-mesh.

"The oversize is smail in amount and year low in zinc so instead of recrushing year lower lo

50-mesh.

"The oversize is small in amount and very low in zinc, so instead of recrushing it, it is put directly into the finished pyrite. The three sizes, A, B and C, are separated, and the products drawn from the bins on the first floor into tram cars. These are run out of the mill to the loading trestie and dumped into freight cars. The pyrite product is smelted in the United States smelter near by, and the zinc product is shipped to the Kansas zinc smelters.

"The plant is electric driven by a 20-

the zinc product is shipped to the Kansas zinc smelters.

The plant is electric driven by a 20horsepower motor, the fifteen Huff separators requiring about one-third horsepower each. The generating apparatus
for the electrostatic field is located in a
small room on the finishing floor. A 3horsepower motor is directly coupled
to a generator, and the strength of field
is controlled from a small switchboard.

The plant is operated in conjunction with
the concentrator, and the superintendence, assaying and bookkeening is taken
care of by the smelter staff.

"This electrostatic plant not only removes the objectionable zinc from the
lad-pyrite concentrate, but makes of it
a marketable product, and, instead of
being a total loss, it is made to produce
a profit. The electrostatic process in
these two plants demonstrates two applications in ore dressing, one the custom
plant making low-grade ores profitable,
and the other as an adjunct to a wolconcentrator for the recovery of zlint.

"Besides these plants, there is being
installed in Nevada a plant working on
crude silver ores, wherein the ore goes
through no concentrating machinery prior
to its electrostatic treatment. The process in
has been proved applicable to many special problems, such as the concentration
of copper and lead-silver ores in heavy
gangues such as garnet, barite, epidote. Le-

Ore Shipments.

The Utah Ore Sampling company on Wednesday released four cars of ore from Utah and one car from Nevada camps.

BELIEVE MARKET IS NOW AT BOTTOM

James A. Pollock & Co. bankers and brokers, 323-325 South Main street, fur-nish the following, received over their private wire yesterday afternoon; Paine, Webber & Co. letter, Boston;

Makes Available Heretofore
Uscless Tonnage In Several
Camps of State.

Camps of State.

Having perfected the Huff electrostatic process in its Midvale works to the extent that the capacity of the plant is beyond its own requirements, the United States Smelting, Refining and Mining company will place this portion of its works at the disposal of its customers who have a complex lead-zine-iron tonnage developed, but no means of bringing it within commercial shape. This step will afford an immediate market for the stubborn tonnages of Bingham, Park City and Stockton camps, which have heretofore, outside of individual operations, been unable to procure a market for reteat in the dividend will be consolidated company, to find that the stubborn tonnages of Bingham, Park City and Stockton camps, which have heretofore, outside of individual operations, been unable to procure a market for reteat in the dividend checks.

The United States company therefore, outside of individual operations, been unable to procure a market for milling area for the united states company was described in detail, and the following except will be of interest in this connection:

The United States company, therefore, outside of individual operations, been unable to procure a market for milling organization. In the constant of the process of the company was one of the largest that the company will place this protein of the state of the state of the state of the consolidated and Utila Copper properties. The United States company was caperibed in the state of the united states company was described in detail, and the following except will be of increased in detail, and the following except will be of increased in detail, and the following except will be of increased the following except will be of in

to force decided action in either direction.

Gallagher says, New York: Ray Consolidated, Chino, Giroux closed a fraction above the opening. Nevada Hills up a fraction. Ely Central weak. Tonobahs, Oll and Tinties unchanged. American Tobacco off one point, and Standard Oll off four points.

Hornblower letter, Boston: Coppers are very dull. The buying, which was limited, was considered good. There does not seem to be many stocks for sale, and there is some good supporting orders just under present prices. The closing was steady but dull.

New York Sun says: It seemed to take less buying to put stocks up today than was required by the way of sales yesterday to put them down. An upward movement started in the first hour on a smaller volume of transactions than in the corresponding twenty-four hours. The afternoon stock market was very dull with a generally firm tone.

REEVES & CO., INC.
Rexburg, Idaho, Dec. 9th, 1919.
Merchants' Protective Association,
Sait Lake City, Utah.
Gentlemen:—
I received your check dated Dec. 5th,
1910. and can say it was just like finding
money in the road. I am well pleased
with your success in getting that much
money. You have my best wishes heraafter and all my bad bills to collect.
Wishing you success in the future, I
remain, Yours very respectfully,
The above is a letter we just received.

M. M. BARBER.

The above is a letter we just receive from our client. Mr. Barber. We receive many such letters from appreciative clients, scattered from New York to Sar Francisco, We collect money everywhere We will collect some for you if you turn in your claims. That others have falled to obtain your money for you does no mean that we cannot succeed. This Association is different from all other Col. lection Agencies. We are the only Collection Agency in the United States that paid an assessment to the United States that paid an assessment to the United States ton levied an assessment against us for having made about \$25,000 net profits during the year of 1909. We profit by collecting. If we had not collected more money than any other Collection Agency in the United States, we would not have been assessed. This must be conclusive evidence to you that we can do better on your claims than any other Collection Agency in the United States. Turn them in.

Are You a Perfect Man?

With No Back Pains No Nervousness No Waste of Tissue No Loss of Ambition

But With Plenty of Life, Energy and Vigor of Youth

To be strong is the aim of every man, and yet how many we find whe are wasting the vitality and strength which nature gives them. Instead of developing into the strong, vigorous young fellows that nature intended them to be, they find themselves despondent—no ambition to do anything. They struggle almiesely along, sooner or later to become victims of that dread disease, nervous debility; their finer sensibilities blunted and their nerves shattered.

A Sure Cure A Small Fee

The great volume of my practice allows me to make uniformly low fees, so that no man need be without proper treatment. I absolutely have the best equipped medical offices in the west. This fact, together with my knowledge and experience, insures every man receiving the best and most scientific treatment known to the profession.

I never make my fees or means of paying them out of the reach of any man, for I have plenty of this world's goods, and it is my desire to give to diseased men the best treatment to be had for a small outlay of money. Within the reach of any man. the reach of any man.

DON'T DELAY-CALL TODAY

Perfected in Old Cases Which Have Been Neglected or Unskilling Treated. NO EXPERIMENTS OR FAILURES.

NOT A DOLLAR NEED BE PAID Unless Cured to STAY CURED

ONE-HALF THE FEE CHARGED BY OTHER SPECIALISTS

WEAKNESS I use the quickest cure in the world for Weakness of Men, which I will cure to stay cured. Call and investigate. Make no mistake. Come to me first and avoid wasting your hard earned cash on worthless medicines or treatments. Consultation and examination free. Chronic Cases If you have an old case that has been hanging on for months and which medicines from doctors and druggists can't seem to cure there is some reason. I have a scientific cure for these cases and will cure right, quickly and cheaply. Don't let a disorder drag you down in health.

Blood and Skin Disorders Eruptions, pimples, swellings, rheumatism, to Hot Springs; I can cure you cheaper and better. Under my scientific treatment all these symptoms quickly disappear, and robust health returns. It others have falled to cure or are not benefiting you, come to me. I cure permanently, quickly and cheaply.

Varicocele Usually occurs on the left side and often causes draggings, achieved the property of the palms in the groin or toins, worry, nervousness. They are usually caused by strains, lifting, bicycle riding, prolonged standing on the feet, sedentary habits. I cure without cutting. The cure is safe and absolute-processed the strains of the cure is safe and absolute. Bladder Trouble and Kidney Disorders. Have you backache:

Bladder Trouble and Kidney Disorders Have you backache? Plexion? Have you weak or fainting spells? Do your feet swell? If you have any of these symptoms don't wait until your case gets bad. I will give you a careful examination free. Come now.

Nervous Men Able To Work Every Day, feel There is usually pain across the small of the back blue rings under the eyes, speeds before the eyes sleep does not refresh you, you get up in the morning feeling tired; your memory is poor, your mind wanders; you are hollow eyed; you are fearful, always expecting the worst to happen; nervous, no appetite. Dear reader, come to me, and I will lend you a helping hand. I cure cheaply and permanently. Come today—don't put it off any longer.

CERTAINTY OF CURE

Is what you want. I will give you a written LEGAL GUARANTEE to cure you or refund your money. If you are tired of paying out money and waiting for results, this is your opportunity to be cured quickly. There is all the difference in the world between doctors and treatments, and you want the best.

OUT-OF-TOWN MEN VISITING THE CITY

Consult me at once upon arrival, and maybe you can be cured before returning home. Many cases can be cured in one, two or more visits, continuing treatment when home. Consultation and advice free. Medicines \$1 to \$6.50 per course.

Every "Worn-Out." Diseased and Nervous Man Has a Chance to Get Cured.

I do not "Patch Up." I cure to stay cured. Do not delay. Call or write today. I diagnose by exclusion. No mistakes made. Consultation free. Examination free. Urinal analysis free.

Write for self-examination blank if unable to call. Many cases can be cured at home, secretly. No loss of time. Salt Lake Medical Institute
